Professional Summary

Motivated and detail-oriented Computer Science undergraduate with hands-on experience in **full-stack web development, cloud storage, and computer vision technologies**. Skilled in designing and deploying scalable applications using **Java, Spring Boot, and MERN stack**, with proficiency in **Git** for version control and **AWS S3** for cloud-based storage solutions. Experienced in **image processing** and **3D visualization with Three.js and OpenCV**. Passionate about contributing to innovative projects and expanding technical expertise.

Education

B.Tech in Computer Science and Engineering

KIIT University (2023-2027)

Technical Skills

Fullstack Development • Git • AWS S3 • Image Processing • Three.js • OpenCV • Java • Spring Boot • MERN Stack

Projects

Fullstack Web App – Built and deployed a scalable web application with authentication and cloud storage integration.

Image Processing with OpenCV – Developed scripts for real-time image analysis and object detection.

3D Visualization with Three.js – Created interactive 3D visualizations for web-based applications.
